

A Revolution in Docking

<p>Stern Saver</p>	<p>MSRP \$399.95</p>
	<p>The safest way to stern tie a vessel</p> <p>Until now there has been no way to securely stern tie a vessel with a swim platform. Now there is Stern Saver. Stern Saver eliminates the possibility of your swim platform slipping under or over a dock, by providing an effective vertical barrier between the two. Designed for vessels up to 38 ft. in length. Made from nickel plated 6061 billet aluminum and recycled plastic lumber, Stern Saver can swing out of the way for short trips, or be easily removed via two quick release pins for normal operation.</p> <p>Comes with 2 units as shown.</p>
<p>Dock Saver</p>	<p>MSRP \$199.95</p>
	<p>Docking made simple</p> <p>Tying off at a dock equipped with Dock Saver, there is no need for fenders. Dock Saver provides a vertical barrier between your vessel and the dock. The only contact point on your vessel is the rub rail. Made from nickel plated 6061 billet aluminum and recycled plastic lumber, Dock Saver can be easily adjusted up or down via a quick release pin to accommodate different size vessels.</p>
