

# 2Spec Manufacturing

## Services

2Spec is a complete manufacturing facility with products and services to meet today's high standards in:

- **Mechanical Engineering**  
*with a mechanical engineer on staff, we can take your ideas and turn them into cad files and drawings*
- **On Site Consulting**  
*We will come to your site to assist you with your mechanical needs*
- **Prototype Development**  
*sketches, drawings, or cad files are all we need to build your prototype*
- **Short Run Production**  
*from prototype to production, and 100% in process control on tight tolerances*
- **Machining of Exotic Materials**  
*from Tantalum to Niobium, from Kynar to PEEK, we have cut almost everything*
- **Fabrication of Aftermarket Parts**  
*for your equipment when lead time for a new part is too long, or if you have equipment that is no longer supported*
- **Same Day/Next Day Modifications**  
*we know the urgency to get a machine up or to meet deadlines*
